

Lhoist Group Steel Market Specialist

Since its foundation in 1889, the Belgian family-owned Lhoist Group (with several thousands employees worldwide today) has pursued a strategy of intensive growth and is today a profitable group and the leader in the production of lime and dolime for the industry, agriculture and the environment.

About 40 kilograms of lime are necessary to produce 1 tonne of pure steel...

Currently we are looking for a specialist willing to undergo an extensive training to become an expert in application of our products for steel market in Business Unit Poland.

Lhoist is investing in the future of promising professionals.

We believe we can help by giving an opportunity to apply your background and enthusiasm to the business environment within our organisation.

Description:

- Lime and dolime are used commonly in the steelmaking process for converting, effluent handling, steel refining, water treatment, refractory linings and more. New products and services are introduced in various steps of the steelmaking process leading to major quality improvements in processes.
- The Steel Market Specialist will gain professional knowledge about steel industry, Lhoist products and applications.
- First phase will include 6-month introduction and training in our Corporate R&D Centre in Nivelles (Belgium) including cooperation with Laboratory, Technical Assistance and Documentation Team to gain extensive knowledge about the processes and products.
- Second phase will consist of 6 month project work in Lhoist sister company in Germany, Rheinkalk, with steel market experts, to use the theoretical background, extend knowledge about products and application and further develop professional qualifications.
- After the introduction, training and projects completed in Belgium and Germany, the specialist will take a leading role at coordinating Polish steel market in terms of Lhoist products and applications.
- Our offer is an opportunity for a graduate or young professional open to challenges and willing to gain high level knowledge and practice to become a valuable expert.

Profile :

- Engineering degree in the area of metallurgy or closely related.
- Basic knowledge / experience within steel industry is a plus
- Fluent in English
- Willing to relocate
- Challenge oriented with professional attitude
- Flexible, open, adaptable
- PC literate with a current clean driving licence
